Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

The amendment filed on 5-10-2005 has been entered. It is noted the withdrawn claims 10, 11 and 19-21 depend from canceled claims.

Claim Rejection - 35 U.S.C. 112, first paragraph

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 24 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claimed fork end tapering into a shaft has no support from the original specification.

Claims Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3724.

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 24 is rejected under 35 U.S.C. 102(b) as being anticipated by Smith (U.S. Patent No. 1,809,254).

Smith discloses a cooking implement (see page 1, lines 1-3) comprising a hollow sheath (10) closed at a first end and having an opposite female end; a utensil comprising a fork end (1,1) for interacting with a food item, the fork end (1,1) tapering into a shaft (3,3), the shaft (3,3) embedded into a male portion (9) opposite the fork end (1,1), the male portion (9) of the utensil being insertable into the female end of the sheath (10); and whereupon joining the male portion (9) and the female end, the sheath (10) forming a handle, the sheath (12) being sufficiently elongate to allow a user to safely manipulate food items being coked in an environment of heat and flames as claimed.

Claims Rejection - 35 U.S.C. 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (U.S. Patent No. 1,809,254) in view of Harmon et al. (U.S. Patent No. 6,877,232).

Smith's cooking implement as set forth shows all the claimed structure except the sheath (10) and the male portion (9) are not made of heat resistant plastic.

Harmon et al. show a cooking implement comprising handle (7) made of heat resistant plastic (see column 4, lines 50-63).

It would have been obvious to one skilled in the art to modify Smith by making the sheath (10) and the male portion (9) out of heat resistant plastic to prevent a user's hand holding the cooking implement from getting burned as taught by Harmon et al.

Indication of Allowable Subject Matter

Claims 8 and 9 are allowed.

Action Made Final

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
